

**ABSTRACT OF THE DISCLOSURE**

A hands free umbrella includes an umbrella having a pole that has a  
5 bottom end and a top end. A canopy is attached to the top end of the pole.  
A handle is attached to the bottom end of the pole and extends downwardly  
away therefrom. The handle has a bottom side, a top side and a peripheral  
side wall extending between the top and bottom sides. The handle is  
substantially solid. A securing member for releasably attaching the handle  
10 to a belt is positioned on the handle.
